ABSTRACT

The development of voluntary nuclear standards in the United States is an active and necessary endeavor of the technical community concerned with the safe, orderly, and economic development of the nuclear potential. There are almost 8000 people presently involved either in writing voluntary standards and codes or in the management and processing roles necessary for their approval and promulgation. This document records the current participation of these people as member, chairman, or secretary of about 900 identified committees and projects. The standards projects are identified with the organizations that are responsible for the preparation, review, and maintenance of the standards and that provide support through supervisory committees and headquarters staff.

The Directory has four major sections: personnel, employers, committees, and a KWIC Index of committee titles. The Directory can be used to identify those nuclear standards projects currently active, to indicate the participation of employers, and to recognize the contributions of individuals to these often interdisciplinary activities.

CONTENTS

PREFACE

The RDT Standards Office at Oak Ridge National Laboratory is responsible for the compilation and publication of the Directory of Personnel Involved in the Development of Nuclear Standards in the United States. Contained in the Directory are compilations of those personnel, employers, and standards activities that were known to that office during 1976. This edition contains only personnel actively serving on committees and only addresses at which active personnel are employed.

The format of this publication is essentially the same as that of the 1976 Edition. It is divided into four sections, each of which is printed on a particular color of paper for ease in identification.

1. **Personnel: (white pages)**
   Personnel are listed alphabetically, with employer name and address, accession number, and committee activities. Chairmen cochairmen, secretaries, and alternates are designated by the letters *C*, **C*, *S*, or *A*, respectively, following the committee designation.
2. **Employers: (blue pages)**
   The first pages of this section list companies and organizations alphabetically within each of 14 categories. On the pages immediately following the lists of names of employers, more complete addresses are arranged alphabetically within each of the 14 types, and the personnel located at each address are listed.
3. **Standards Organizations and Committees: (yellow pages)**
   Organizations and societies that sponsor or serve as secretariat to standards-writing or -processing groups are listed in alphabetical order by acronym, and the associated standards committees, subcommittees, and working and task groups are listed in alphanumeric order under the appropriate acronym. A title for the project, often shortened of necessity, follows the committee designation. The personnel serving on each committee are also listed.
4. **Key-Word-In-Context (KWIC): (green pages)**
   This index is the result of a permutation of the title of each committee in Section 3 around selected key words, which are, in turn, arranged alphabetically. The result is an index that allows the identification of a project through a single word in the contracted title of the committee.

Each standards generating organization has an established method of designating its committee, subcommittee, and other group activities. An attempt has been made to simplify the information form designation procedures by using acronym and numerical designations, although all committees and groups will be designated by a title, often shortened, in the KWIC section. The criteria for listing a specific committee in the Directory were based on the committee's activity in actually preparing nuclear standards or standards oriented for nuclear application or in the management of nuclear standards activities. In most cases the committees were selected by the sponsoring society.

The most coherent information concerning current committee membership and activities can be supplied by the secretariats in a form appropriate to each organization. However, individual information forms are provided at the back of this document for submission of personal data and for the purpose of indicating the totality of information needed for the inclusion of a person in the Directory listing.

Although many sources of information were used to update from the 1975 Edition, it is unfortunate that some persons who are active and effective in nuclear standards work may have been omitted unintentionally. It is also true that some names of those who are no longer participants in the designated projects are undoubtedly included and that some projects are included for which the responsible groups have been disbanded. As any errors of omission and commission are noted, the RDT Standards Office, Oak Ridge National Laboratory, P.O. Box X, Oak Ridge, Tennessee 37830, should be notified and given the correct and complete information necessary for correction.

BLANK PAGE

Special Lists

The Directory computer code package was designed to also provide for search-and-list retrieval of the following types of information in addition to those of the Directory. Specialized lists can be furnished to those who have need. Some examples of special lists are:

1. All entries for a particular employer, which will include all relevant personnel and can include a listing of the committees on which they serve.
2. All committees for which a particular organization holds a secretariat. This list will include the members of each activity and can include personnel corporate addresses and the total standards activity of each person.
3. A particular committee or subcommittee, including all members and their addresses and other standards activities.
4. All employers of a particular category, including the personnel at each address.
5. All committee and subcommittee chairmen, cochairmen, and secretaries.

In addition to these broad search-and-list retrieval possibilities, subsets of 1, 2, and 3 above are available.

1976 Directory Statistics

Number of Personnel in Directory	7 685
Number of Program Members[1]	13 141
Number of Organizations (Societies)	49
Number of Committees	906
Number of Employers[2]	3 225
Number of Employers in each type:[3]	
1. Architect-Engineer Constructor	57
2. Consulting Firm and Consultants	609
3. Utility, Publicly Owned	8
4. Utility, Investor Owned	83
5. Government, USERDA and USNRC	2
6. Government, Other	172
7. ERDA Facilities and Contractors	20
8. Nuclear Steam System Supplier	11
9. Nuclear Service Supplier	27
10. Fuel Designer Fabricator	7
11. Fuel Cycle (Mining, Milling, Reprocessing)	35
12. Equipment Manufacturer	611
13. Societies, Insurance, Other Industry, etc.	766
14. Colleges and Universities	138

[1]Member is one person per position; that is, a person with four committee memberships is counted as four members.

[2]Employer includes all addresses for companies, organizations, individual consultants, educational institutions, and governmental bodies.

[3]Number of employers includes only the different organizations within each category, regardless of the number of addresses for each; that is, Union Carbide Corporation should be counted once within a category although several addresses are actually used.

ACKNOWLEDGMENTS

Many tasks are involved in gathering, compiling, and processing the vast amount of information contained in this Personnel Directory.

The computer program was developed and is maintained by J. H. Owings, M. B. Wright and B. L. McCreary of Computer Sciences. C. R. Bush of Support Engineering has been responsible for the maintenance of the data base. Others who have contributed their expertise are J. H. Heatherly and J. H. Rayburn of Technical Applications Control, and W. J. Grumbach of the ORGDP Forms Department.

We also wish to acknowledge the valuable help received from various members of the Information Division

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1976

Section 1. PERSONNEL

This section is an alphabetical listing of persons currently involved in nuclear standards development, including each person's affiliation and address, accession number, and standards activity (activities).

The standards activity shown for each person is shown by a one-, two-, three-, or four-component designation beneath the individual's company name and address. The designation is separated into various components in descending hierarchical order of organization, committee, subcommittee, and task. A title, often contracted, for the last component, indicating the specific task, and the document number, if known, are given. For example, if an individual is working on ANS-59.03, that entry will appear below his address, and the last component will be identified below the entry as:

ANS-59.03
Safety-Related Control Air Systems (N187)

Organization acronyms are listed at the beginning of Section 3 (yellow pages).

If an individual is chairman, cochairman, secretary, or designated alternate of an activity, this is shown by a *C*, a **C*, an *S*, or an *A* opposite the activity. Generally, in this compilation, the first component following a standards organization acronym is a committee, the second is a subcommittee, and the third is a task. This nomenclature may not agree with that actually used by a specific organization.

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1976

Section 2. EMPLOYERS

The employers having personnel involved in the development of voluntary nuclear standards are arranged alphabetically within each of the following 14 categories:

1. Architect-Engineer/Constructor
2. Consulting Firms and Consultants
3. Utility, Publicly Owned
4. Utility, Investor Owned
5. Government, USERDA and USNRC
6. Government, Other
7. ERDA Facilities and Contractors
8. Nuclear Steam System Supplier
9. Nuclear Service Supplier
10. Fuel Designer/Fabricator
11. Fuel Cycle (Mining, Milling, Reprocessing)
12. Equipment Manufacturer
13. Societies, Insurance, Other Industry
14. Colleges and Universities

A list of company names in each category begins on the following page. This listing is followed by another, in the same order, that includes the company address and the names of employees at each address.

INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1976

Section 3. STANDARDS ORGANIZATIONS AND COMMITTEES

The organizations sponsoring and serving as secretariat to nuclear standards committees are listed alphabetically under their acronyms. Following the organizations are the standards committees under the aegis of the Nuclear Standards Management Board (NSMB) of the American National Standards Institute (ANSI) with their secretariats.

The following pages list the identified standards committee, subcommittees, subgroups, writing groups, and task groups, in descending hierarchical order, under the acronym of the sponsoring organization. An identification for the last component of each combination of codes in these chains is given as a title, often contracted, of the specific task. All ANSI "N" and "Z" committees are listed under the acronym of the appropriate secretariat.

The final pages show the membership of each identified activity; the chairman, cochairman, secretary, and alternates, where known, are indicated following the personal name. The five-digit number following each name is the computer accession number for that person. The name of the company with which the person is affiliated and his company address can be obtained from Section 1.

SOCIETY AND ORGANIZATION ACRONYMS

AAPM	American Association of Physicists in Medicine
ABS	American Bureau of Shipping
ACGIH	American Conference of Governmental Industrial Hygienists
ACI	American Concrete Institute
ACI-ASME	American Concrete Institute—American Society of Mechanical Engineers
ACS	American Chemical Society
AIA	American Insurance Association
AICHE	American Institute of Chemical Engineers
AIHA	American Industrial Hygiene Association
AISE	Association of Iron and Steel Engineers
ANS	American Nuclear Society
ANSI	American National Standards Institute
APHA	American Public Health Association
ASCE	American Society of Civil Engineers
ASME	American Society of Mechanical Engineers
ASNT	American Society for Nondestructive Testing
ASQC	American Society for Quality Control
ASTM	American Society for Testing and Materials
AWS	American Welding Society
BRH	Bureau of Radiological Health
CBEMA	Computer and Business Equipment Manufacturers Association
CRCPD	Conference of Radiation Control Program Directors
EEI	Edison Electric Institute
ENEA	European Nuclear Energy Association
HPS	Health Physics Society
IAEA	International Atomic Energy Agency
ICRA	Interagency Committee on Radiological Assistance
ICRP	International Commission on Radiation Protection
IEC	International Electrotechnical Commission
IEEE	Institute of Electrical and Electronics Engineers
IES	Institute of Environmental Sciences
INMM	Institute of Nuclear Materials Management
ISA	Instrument Society of America
ISCA	Intersociety Committee on Methods for Ambient Air Sampling and Analysis
ISO	International Organization for Standardization
MPC	Metals Properties Council
NACE	National Association of Corrosion Engineers
NAS-NRC	National Academy of Sciences—National Research Council
NBBPVI	National Board of Boiler and Pressure Vessel Inspectors
NBS	National Bureau of Standards
NCRP	National Council on Radiation Protection and Measurements
NFPA	National Fire Protection Association
NNCSC	National Neutron Cross Section Center
NPSS	Nuclear and Plasma Sciences Society
PES	Power Engineering Society
SAMA	Scientific Apparatus Makers Association
SEAOC	Structural Engineers Association of California
SEAOCC	Structural Engineers Association of Central California
SEAONC	Structural Engineers Association of Northern California
SEAOSC	Structural Engineers Association of Southern California
SEAOSD	Structural Engineers Association of San Diego
SNAME	Society of Naval Architects and Marine Engineers
USDOI	United States Department of the Interior
WRC	Welding Research Council

BLANK PAGE

ANSI-NSMB COMMITTEES

NSMB COMMITTEE	TITLE	SECRETARIAT
N11	Basic Materials and Materials Testing for Nuclear Application	ASTM
N13	Radiation Protection	HPS
N14	Transportation of Fissile and Radioactive Materials	AIA
N15	Methods of Nuclear Material Control	INMM
N16	Nuclear Criticality Safety	ANS
N17	Research Reactors, Reactor Physics, and Radiation Shielding	ANS
N18	Nuclear Design Criteria	ANS
N19	Nonradiological Environmental Effects	ANS
N41	Controls, Instrumentation, and Electrical Systems for Nuclear Power Generating Stations	IEEE
N42	Nuclear Instruments	IEEE
N43	Equipment for Nonmedical Radiation Applications	NBS
N44	Equipment and Materials for Medical Radiation Applications	IEEE
N45	Reactor Plants and Their Maintenance	ASME
N46	Nuclear Reactor Fuel Cycle	AICHE
N48	Radioactive Waste Management	ANS
N13 N42	Radiation Protection Instruments	HPS IEEE
Z1	Quality Assurance	ASQC

NSMB "N" and "Z" committees will be found listed under the acronym of their respective secretariats.

INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1976

Section 4. KWIC INDEX

The KWIC Index lists the titles (in many cases necessarily shortened) of all standards organizations, committees, subcommittees, and tasks included in this Directory. The titles are permuted around selected key words, which are listed alphabetically in the center of the page; # indicates the beginning of a particular title and * indicates the end.

The terms in the right-hand column are those associated with the specific task and are the same as those appearing in the committee list and in the personnel list. The KWIC Index permits ready identification of the project(s) actively concerned with a specific topic, such as LMFBR. The relevant committees and their membership can be found in Section 3 and the corporate addresses of the individual members in Section 1.

INFORMATION FORMS AND GENERAL COMMENTS

Continual change is a way of life for all standards activity, and with cooperation the Personnel Directory can become an even more valuable document. The RDT Standards Office periodically updates the computerized data base for the Directory.

The search-and-list retrieval service is available to assist contributors to the Directory in keeping their portion current. Organizations that have a need for this service should contact the RDT Standards Office at the address given in the Preface.

Four copies of the information form are included for use in submitting future personnel information. Additional forms are available from the same office.

INFORMATION FORM FOR
PERSONNEL INVOLVED IN DEVELOPMENT OF NUCLEAR STANDARDS IN THE UNITED STATES

TO PROVIDE INFORMATION ON NEW PERSONNEL, PERSONNEL NO LONGER ACTIVE, CHANGES IN EMPLOYER ADDRESS, CHANGES IN STANDARDS ACTIVITIES, OR CHANGES IN (OR NEW) ORGANIZATION, COMMITTEE, SUBCOMMITTEE, OR TASK ASSIGNMENTS AND DESIGNATIONS, PLEASE COMPLETE A COPY OF THE FOLLOWING FORM (PRINT OR TYPE), FOLD ON LINES INDICATED, TAPE OR STAPLE, AND MAIL.

Check boxes "C" or "D" to designate if person's name, company name, or company address is to be: C-changed to those shown or D-deleted. If new entry, do not check boxes.

Date _____ Accession Number _____ (for computer use only)

	C	D
NAME: (Last) _____ (Two Initials) _____	☐	☐
ADDRESS: Employer Name _____	☐	☐
Division (if appropriate) _____	☐	☐
P.O. Box or Street Address _____	☐	☐
City, State, Zip Code _____	☐	☐

EMPLOYER TYPE (check one of the following) Employer Code _____ (for computer use only)

- ☐ 1. Architect - Engineer Constructor
- ☐ 2. Consulting Firm Consultants
- ☐ 3. Utility, Publicly Owned
- ☐ 4. Utility, Investor Owned
- ☐ 5. Government, ERDA and NRC
- ☐ 6. Government Other
- ☐ 7. ERDA Facilities and Contractors
- ☐ 8. Nuclear Steam System Supplier
- ☐ 9. Nuclear Service Supplier
- ☐ 10. Fuel Designer Fabricator
- ☐ 11. Fuel Cycle (Mining, Milling, Reprocessing)
- ☐ 12. Equipment Manufacturer
- ☐ 13. Societies, Insurance, Other Industry, etc
- ☐ 14. Colleges and Universities

STANDARDS ACTIVITY - Please print or type the appropriate activity abbreviations below. If more than nine entries are required, use an additional form.

In "C S A" column, place letter in box "C" for chairman, "S" for Secretary, or "A" for alternate, as applicable. Otherwise, do not use box. If chairman, secretary, or alternate position is to be deleted, check box in "C S A-D" column. If activity is to be deleted, check box "Act-D."
