ABSTRACT

The development of voluntary nuclear standards in the United States is an active and necessary endeavor of the technical community concerned with the safe, orderly, and economic development of the nuclear potential. There are almost 3000 people presently involved either in writing voluntary standards and codes or in the management and processing rules necessary for their approval and promulgation. This document records the current participation of these people as member, chairman, or secretary of about 300 identified committees and projects. The standards projects are identified with the organizations that are responsible for the preparation, review, and maintenance of the standards and that provide support through supervisory committees and headquarters staff.

The Directory has four major sections: personnel, employers, committees, and a KWIC Index of committee titles. The Directory can be used to identify those nuclear standards projects currently active, to indicate the participation of employers, and to recognize the contributions of individuals to these often interdisciplinary activities.

CONTENTS

Preface vii

Section 1. Personal Name . . . . . white
Section 2. Company Name . . . . . blue
Section 3. Standards Organizations and Committees . . . . . yellow
Section 4. Key-Word-In-Context (KWIC) Index . . . . . green
Information Forms and General Comments . . . . . salmon

PREFACE

The RDT Standards Office at Oak Ridge National Laboratory is responsible for the compilation and publication of the Directory of Personnel Involved in the Development of Nuclear Standards in the United States. Contained in the Directory are compilations of those personnel, employers, and standards activities that were known to that office during 1975.

The format of this publication is essentially the same as that of the 1974 Edition. However, Category 14, Colleges and Universities, has been added to the employer categories, and these institutions have been removed from Category 13.

Program changes have been made whereby the 1975 Edition contains only personnel actively serving on committees and only addresses at which active personnel are employed.

The Directory is divided into four sections, each of which is printed on a particular color of paper for ease in identification.

1. **Personal Name: (white pages)**
   Personnel are listed alphabetically, with employer name and address, accession number, and committee activities. Chairman, secretaries, and alternates are designated by the letters *C*, *S*, or *A*, respectively, following the committee designation.
2. **Company Name: (blue pages)**
   The first pages of this section list companies and organizations alphabetically within each of 14 categories. On the pages immediately following the lists of names of employers, more complete addresses are arranged alphabetically within each of the 14 types, and the personnel located at each address are listed.
3. **Standards Organizations and Committees: (yellow pages)**
   Organizations and societies that sponsor or serve as secretariat to standards-writing or -processing groups are listed in alphabetical order by acronym, and the associated standards committees, subcommittees, and working and task groups are listed in alphanumeric order under the appropriate acronym. A title for the project, often shortened of necessity, follows the committee designation. The personnel serving on each committee are also listed.
4. **Key-Word-In-Context (KWIC): (green pages)**
   This index is the result of a permutation of the title of each committee in Section 3 around selected key words, which are, in turn, arranged alphabetically. The result is an index that allows the identification of a project through a single word in the contracted title of the committee.

Each standards generating organization has an established method of designating its committee, subcommittee, and other group activities. An attempt has been made to simplify the information form designation procedures by using acronym and numerical designations, although all committees and groups will be designated by a title, often shortened, in the KWIC section. The criteria for listing a specific committee in the Directory were based on the committee's activity in actually preparing nuclear standards or standards oriented for nuclear application or in the management of nuclear standards activities. In most cases the committees were selected by the sponsoring society.

The most coherent information concerning current committee activities membership can be supplied by the secretariats in a form appropriate to each organization. However, individual information forms are provided at the back of this document for submission of personal data and for the purpose of indicating the totality of information needed for the inclusion of a person in the Directory listing.

Although many sources of information were used to update from the 1974 Edition, it is unfortunate that some persons who are active and effective in nuclear standards work may have been omitted unintentionally. It is also true that some names of those who are no longer participants in the designated

BLANK PAGE

projects are undoubtedly included and that some projects are included for which the responsible groups have been disbanded. As any errors of omission and commission are noted, the RDT Standards Office, Oak Ridge National Laboratory, P.O. Box X, Oak Ridge, Tennessee 37830, should be notified and given the correct and complete information necessary for correction.

Special Lists

The Directory computer code package was designed to also provide for search-and-list retrieval of the following types of information in addition to those of the Directory. Specialized lists can be furnished to those who have need. Some examples of special lists are:

1. All entries for a particular employer, which will include all relevant personnel and can include a listing of the committees on which they serve.
2. All committees for which a particular organization holds a secretariat. This list will include the members of each activity and can include personnel corporate addresses and the total standards activity of each person.
3. A particular committee or subcommittee, including all members and their addresses and other standards activities.
4. All employers of a particular category, including the personnel at each address.
5. All committee and subcommittee chairmen and secretaries.

In addition to these broad search-and-list retrieval possibilities, subsets of 1, 2, and 3 above are available.

1975 Directory Statistics

Number of Personnel in Directory	7,837
Number of Program Members[1]	13,209
Number of Organizations (Societies)	52
Number of Committees	916
Number of Employers[2]	3,401
Number of Employers in each type:[3]	
1. Architect-Engineer/Constructor	60
2. Consulting Firm and Consultants	648
3. Utility, Publicly Owned	7
4. Utility, Investor Owned	80
5. Government, USERDA and USNRC	2
6. Government, Other	238
7. ERDA Facilities and Contractors	18
8. Nuclear Steam System Supplier	11
9. Nuclear Service Supplier	31
10. Fuel Designer/Fabricator	6
11. Fuel Cycle (Mining, Milling, Reprocessing)	40
12. Equipment Manufacturer	606
13. Societies, Insurance, Other Industry, etc.	772
14. Colleges and Universities	135

[1] Member is one person one position; that is, a person with four committee memberships is counted as four members.

[2] Employer includes all addresses for companies, organizations, individual consultants, educational institutions, and governmental bodies.

[3] Number of employers includes only the different organizations within each category, regardless of the number of addresses for each; that is, Union Carbide Corporation should be counted once within a category although several addresses are actually used.

ACKNOWLEDGMENTS

Many tasks are involved in gathering, compiling, and processing the vast amount of information contained in this Personnel Directory.

The computer program was developed and is maintained by J. H. Owings and M. B. Wright of Computer Sciences. F. C. Olden of Support Engineering has been responsible for the maintenance of the data base. Others who have contributed their expertise are J. H. Heatherly and J. H. Rayburn of Technical Applications Control, B. J. Cochran, J. Hill, and P. McNutt of Engineering, and W. J. Grumbach of the ORGDP Forms Department.

We also wish to acknowledge the valuable help received from various members of the Information Division.

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1975

Section 1. PERSONAL NAME

This section is an alphabetical listing of persons currently involved in nuclear standards development, including each person's affiliation and address, accession number, and standards activity (activities).

The standards activity shown for each person is shown by a one-, two-, three-, or four-component designation beneath the individual's company name and address. The designation is separated into various components in descending hierarchical order of organization, committee, subcommittee, and task. A title, often contracted, for the last component, indicating the specific task, and the document number, if known, are given. For example, if an individual is working on ANS-59.03, that entry will appear below his address, and the last component will be identified below the entry as:

ANS-59.03
Safety-Related Control Air Systems (N187)

Organization acronyms are listed at the beginning of Section 3 (yellow pages).

If an individual is chairman, secretary, or designated alternate of an activity, this is shown by a *C*, an *S*, or an *A* opposite the activity. Generally, in this compilation, the first component following a standards organization acronym is a committee, the second is a subcommittee, and the third is a task. This nomenclature may not agree with that actually used by a specific organization.

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1975

Section 2. COMPANY NAME

The employers having personnel involved in the development of voluntary nuclear standards are arranged alphabetically within each of the following 14 categories:

1. Architect-Engineer/Constructor
2. Consulting Firm and Consultants
3. Utility, Publicly Owned
4. Utility, Investor Owned
5. Government, USERDA and USNRC
6. Government, Other
7. ERDA Facilities and Contractors
8. Nuclear Steam System Supplier
9. Nuclear Service Supplier
10. Fuel Designer/Fabricator
11. Fuel Cycle (Mining, Milling, Reprocessing)
12. Equipment Manufacturer
13. Societies, Insurance, Other Industry, etc.
14. Colleges and Universities

A list of company names in each category begins on the following page. This listing is followed by another, in the same order, that includes the company address and the names of employees at each address.

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1975

Section 3. STANDARDS ORGANIZATIONS AND COMMITTEES

The organizations sponsoring and serving as secretariat to nuclear standards committees are listed alphabetically under their acronyms. Following the organizations are the standards committees under the aegis of the Nuclear Standards Management Board (NSMB) of the American National Standards Institute (ANSI) with their secretariats and executive directors.

The following pages list the identified standards committee, subcommittees, subgroups, writing groups, and task groups, in descending hierarchical order, under the acronym of the parent organization. An identification for the last component of each combination of codes in these chains is given as a title, often contracted, of the specific task. All ANSI "N" and "Z" committees are listed under the acronym of the appropriate secretariat.

The final pages show the membership of each identified activity; the chairman, secretary, and alternates, where known, are indicated following the personal name. The five-digit number following each name is the computer accession number for that person. The name of the company with which the person is affiliated and his company address can be obtained from Section 1.

SOCIETY AND ORGANIZATION ACRONYMS

AAPM	American Association of Physicists in Medicine
ABS	American Bureau of Shipping
ACGIH	American Conference of Governmental Industrial Hygienists
ACI	American Concrete Institute
ACI-ASME	American Concrete Institute – American Society of Mechanical Engineers
ACS	American Chemical Society
AIA	American Insurance Association
AICHE	American Institute of Chemical Engineers
AIF	Atomic Industrial Forum
AIHA	American Industrial Hygiene Association
AISE	Association of Iron and Steel Engineers
ANS	American Nuclear Society
ANSI	American National Standards Institute
APHA	American Public Health Association
ASCE	American Society of Civil Engineers
ASME	American Society of Mechanical Engineers
ASNT	American Society for Nondestructive Testing
ASQC	American Society of Quality Control
ASTM	American Society for Testing and Materials

PERSONNEL
INVOLVED IN THE DEVELOPMENT OF
NUCLEAR STANDARDS IN THE UNITED STATES
1975

Section 4. KWIC INDEX

The KWIC *index* lists the titles (in many cases necessarily shortened) of all standards organizations, committees, subcommittees, and tasks included in this Directory. The titles are permuted around selected key words, which are listed alphabetically in the center of the page; # indicates the beginning of a particular title and * indicates the end.

The terms in the right-hand column are those associated with the specific task and are the same as those appearing in the committee list and in the personnel list. The KWIC Index permits ready identification of the project(s) actively concerned with a specific topic, such as LMFBR. The relevant committees and their membership can be found in Section 3 and the corporate addresses of the individual members in Section 1.

INFORMATION FORMS
AND
GENERAL COMMENTS

Continual change is a way of life for all standards activity, and with cooperation the Personnel Directory can become an even more valuable document. The RDT Standards Office periodically updates the computerized data base for the Directory.

The search-and-list retrieval service is available to assist contributors to the Directory in keeping their portion current. Organizations that have a need for this service should contact the RDT Standards Office at the address given in the Preface.

Four copies of the information form are included for use in submitting future personnel information. Additional forms are available from the same office.

INFORMATION FORM FOR
PERSONNEL INVOLVED IN DEVELOPMENT OF NUCLEAR STANDARDS IN THE UNITED STATES

TO PROVIDE INFORMATION ON NEW PERSONNEL, PERSONNEL NO LONGER ACTIVE, CHANGES IN YOUR COMPANY ADDRESS, CHANGES IN YOUR STANDARDS ACTIVITIES, OR CHANGES IN (OR NEW) ORGANIZATION, COMMITTEE, SUBCOMMITTEE, OR TASK ASSIGNMENTS AND DESIGNATIONS, PLEASE COMPLETE A COPY OF THE FOLLOWING FORM (PRINT OR TYPE), FOLD ON LINES INDICATED, TAPE OR STAPLE, AND MAIL.

Please check boxes headed "C", "D", or "N" (if appropriate) to designate if person's name, company name, or company address is to be: C-changed to those shown; D-deleted; or N-no change. If new entry, do not check boxes.

Accession Number _ _ _ _ _ ***(for computer use only)*** ***Date*** _____

	C	D	N
NAME: (Last) (Two Initials)	☐	☐	
ADDRESS: Company Name	☐	☐	☐
Division *(if appropriate)*	☐	☐	☐
P. O. Box or Street Address	☐	☐	☐
City, State, Zip Code	☐	☐	☐

Company Code _ _ _ _ _ ***(for computer use only)*** **COMPANY TYPE** – ***CHECK ONE OF THE FOLLOWING:***

- ☐ 1. Architect-Engineer/Constructor
- ☐ 2. Consulting Firm
- ☐ 3. Utility, Publicly Owned
- ☐ 4. Utility, Investor-Owned
- ☐ 5. Government, USERDA
- ☐ 6. Government, Other
- ☐ 7. National Laboratory
- ☐ 8. Nuclear Steam System Supplier
- ☐ 9. Nuclear Service Supplier
- ☐ 10. Fuel Designer/Fabricator
- ☐ 11. Fuel Cycle (Mining, Milling, Reprocessing)
- ☐ 12. Equipment Manufacturer
- ☐ 13. Other (Industry, University, Insurance, etc.)

STANDARDS ACTIVITY. ***Please print or type the appropriate abbreviations in the following spaces. If more than nine entries are required, please use an additional form or add lines.***

If an Organization, Committee, Subcommittee, or Task is new, please also print or type the entire Title on lines 10, 11, and 12.

Please place letter (if appropriate) in first box at right; i.e., C for chairman, S for secretary, or A for alternate. If you are a member of a committee, etc., do not use box. Please check box headed "D" (if appropriate) to designate if activity is to be D-deleted.
