FOREWARD

The statistics set forth for the period covered by this report are based on data gathered from records available to the public. These data were derived from public county records of mining claim locations, from the public reports of state and federal land offices, from commercial reporting services, and from annual reports to stockholders of land companies. Accordingly, if any fee land has been acquired in a private transaction which has not been entered into a public record or report, that land will not be accounted for in this report. Manpower is not available to survey, acquire and evaluate data from each available source each reporting period. Accordingly, in any given report, the figures quoted for one or more land categories in a given state may be identical to the figures shown in earlier reports even though some change probably has occurred. Such change will be shown on subsequent reports. The figures for the acreage controlled at the beginning of the calendar year are those that were published for that date in the publication entitled, "Statistical Data of the Uranium Industry" GJO-100(75), published and distributed by the Grand Junction Office of the Energy Research and Development Administration.

The report entitled "Survey of Lands Held for Uranium Exploration, Development and Production In Fourteen Western States in the Six Month Period Ending June 30, 1975" contains details of our survey for the first half of Calendar 1975 and is identified as GJO-109(76-1).
