

This account funding was used to support the American Linear Collider Physics Group (ALCPG) and The International Linear Collider (ILC) Snowmass workshop that took place in August, 2005. The workshop lasted 2 weeks. The funds provided by the DOE (\$110 K) were to fund all the computing and secretariat effort of the workshop. This was a very successful workshop as evidenced by the large attendance; about 600 attendees. Some funds were left over (\$12,876.89) and the DOE was informed. It is my understanding that this money has been returned.
