22<sup>nd</sup> Texas Symposium on Relativistic Astrophysics  
December 13-17, 2004  
Stanford University/SLAC  
PI: Elliott Bloom

The XXII Texas Symposium on Relativistic Astrophysics, jointly organized by the Kavli Institute for Particle Astrophysics and Cosmology (KIPAC), the Stanford Linear Accelerator Center, and the Physics Department of Stanford University, was held on December 13-17, 2004. Following the tradition of past Texas Symposia the presentations emphasized recent developments in Cosmology, High Energy Astrophysics and the frontiers between these and Gravitation and Particle Physics.

More than 500 colleagues participated in the Symposium from a spectrum of disciplines mentioned above. There were 9 Plenary Sessions, 3 Parallel Sessions and 2 Poster Sessions held during the five-day program, with 76 oral and 240 poster presentations. These are documented on CD and in the eConf proceedings archive and are available on the OSTI Information Bridge (submitted via eLink Form 241). To access this report, log on to the OSTI website <http://www.osti.gov/bridge/basicsearch.jsp> and search for OSTI ID# 878411. The results will provide access to the Stanford Linear Accelerator Center e-conference page: <http://www.slac.stanford.edu/pubs/slacreports/slac-r-752.html>.

Funding for the conference was provided from several sources, including industry, education and federal agencies. The \$15,000 of funding provided by the Department of Energy under grant **DE-FG02-05ER41362** was used to cover the following costs:

Copy, printing office supplies	\$3367.
Auditorium/facility rentals	\$4190.
Local shuttle service	\$5880.
Administrative support	\$ 322.

Final Financial Report 269A has been submitted to DOE for this grant.
