

DOepatents

**From the 1940s to today...
A central collection of
U.S. Department of Energy
patent information**

***Search patent information
resulting from research
sponsored by DOE and its
predecessor agencies.***

- Accesses more than 35,000 searchable patent records, historic and current, and is updated frequently.
- Offers basic and advanced search capabilities.
- Includes information unique to patents such as assignee and patent number.
- Allows limiting of results to patents owned by DOE.
- Contains bibliographic records, with links to full text where available.

DOE*epatents*

Coverage of DOE patent information is one way to demonstrate the Department's contribution to scientific progress in the physical sciences and other disciplines while promoting:

- research and development,
- innovation and invention, and
- scientific discovery.

DOepatents includes only patents sponsored by DOE through a grant, contract, cooperative agreement, or similar type of funding mechanism.
