

U.S. Department of Energy

OpenNet

DECLASSIFIED

Department of Energy Declassified Documents

OpenNet provides easy, timely access to recently declassified documents, including information declassified in response to Freedom of Information Act requests.

OpenNet also references older document collections from multiple DOE sources.

OpenNet is updated regularly with new documents and information.

U.S. DEPARTMENT OF
ENERGY

Office of Classification

OpenNet makes information that is no longer classified more readily available to the public, in support of the Open Government Initiative.

OpenNet contains:

- documents declassified and determined to be publicly available since October 1, 1994; and
- over 125,000 fully searchable documents and over 495,000 searchable citations.

Check the OpenNet homepage periodically for news and to learn about the latest additions to the database, such as historical information and key documentation on the Manhattan Project as well as the Smyth and Tolman Committee Reports, which constituted the beginnings of declassification efforts.

If you have any questions or comments, please contact us at opennet@osti.gov.
