

Requirement to submit Classified and UCNI to OSTI

- Per DOE Order 241.1B
 - “STI may be classified, Unclassified Controlled Nuclear Information (UCNI), controlled unclassified information (CUI), or unclassified with no access restrictions.”
 - “The majority of DOE-funded STI is publicly releasable, with a small percentage requiring restricted access.”

Requirement to submit Classified and UCNI to OSTI

Per the CRD:

“Implement a site program to identify, prioritize, and make available to DOE OSTI those STI products that the originating site deems useful beyond its boundaries...whether the STI is publicly releasable, controlled unclassified information, or **classified**...”

Classified Program – Additional Initiatives

- Proactively working with both Sandia and Los Alamos to identify current classified (and UCNI) STI backlog and implement technical components to initiate regular STI submissions.
- Additional sites will be contacted in FY14/15 to initiate addressing STI backlog as well as future submissions. Both KCP and LLNL are scheduled for FY14 activity.

Classified Program – Additional Initiatives

- On December 23, 2013 Sandia successfully submitted records via batch upload to CE-Link. This was the first use of the XML Batch in Production by any lab.
- LANL is working on several projects to finalize batch submission process, current timeline is FY14.

Next Steps?

- Begin evaluating what classified systems may exist at your site and what procedural changes may be needed.
- Review the 241.5 and note required metadata.
- Anticipate OSTI contacting your site in the near future about your classified/UCNI STI submissions
